Main features are:

- “Patent Pending” discharge hopper with powder flow improvements.
- Hopper made of food grade black antistatic polymer, no spark risk, guarantee of easy cleaning, good flowing of the product and strength against corrosion.
- Hopper can be also made of stainless steel 304 or 316 on request.
- Support frame with 4 off height adjustable legs and crossbars assembled by special bolted adjustable community design connections.
- Unloading and conveying of the bulk bag content happens thanks to effective Gimat flexible spiral conveyors or shaftless screw conveyors depending on the output required.

Atex 94/9/CE on Request

Safe and partial discharge of bags thanks to a pneumatic device to close the bag spout.

Pneumatic tightening system for dust proof bulk bag discharging.

Pneumatic massage solutions to ensure reliable flow.
